Roman Empire Infrastructure

Download

Download Roman Empire Infrastructure.zip (3 MB)

Unzip the file in a folder with a short path, for example `C:\GIS\Roman Empire Infrastructure`.

Sources and licences

Version of this dataset: 27 October 2026. All sources were downloaded on 27 October 2026; later versions of the sources may differ.

Data	Source	Licence
provinces, cities	DARE, *Digital Atlas of the Roman Empire*, Johan Åhlfeldt, via https://github.com/klokantech/roman-empire (commit a140f13, 2020)	CC BY-SA
monuments (and the monument counts in provinces)	Pleiades, https://pleiades.stoa.org (GIS data package)	CC BY 3.0
roads	Ancient World Mapping Center, after the *Barrington Atlas of the Greek and Roman World* (Talbert, ed., 2000), https://github.com/AWMC/geodata (commit 7ecf8bc, 2024)	ODbL 1.0
elevation	WorldClim 2.1, elevation. Fick, S.E. and R.J. Hijmans (2017), *International Journal of Climatology* 37 (12): 4302–4315, https://www.worldclim.org	CC BY 4.0

Changes made: selection of features and fields, cut to the extent of the empire, names of the Italian regions added, area and counts per province added, roads reprojected to EPSG:3035. The adapted DARE data are shared under CC BY-SA and the adapted roads under ODbL, as these licences require.
